Manual 82389 2301A LSSC Woodward 1 Chapter 1. General Information Description The 9905/9907 series of the Woodward 2301A controls load sharing and speed of generators driven by diesel or gasoline engines, or steam or gas turbines. These power sources are referred to as "prime movers" throughout this manual.

### **2301A Electronic Load Sharing and Speed Control - Elliptical**

There are three types of governors in the small engine market; pneumatic, mechanical and electronic. Small engines are lawnmowers, pressure washers etc., with engines in the 100 cc-1000 cc size. Lawnmowers may have a lever to control engine speed manually or a pneumatic governor for constant RPM.

### **Generator Governor: 10 Steps (with Pictures)**

The white auxiliary wire can be used for helicopter governor gain input adjustments mid-flight, serve as an audible beacon after an "unexpected landing", act as an RPM output for 3-axis gyros that support RPM sensors, be used as an ESC arming lock (coupon for free Arming Lockout Key included) or as a receiver arming lock.
