

Kick Wall Island Diagram

Building a kitchen island can be pretty straightforward if you use stock cabinets for the cabinets and doors. Use simple straight cuts on plywood and stock boards to wrap the cabinets. Before you begin building the island, order your countertop made 21-1/4 inches wide x 56 inches long, so that it's ready to install when the base piece is done.

How to Build a DIY Kitchen Island - Lowe's

A half wall (also called a knee wall) is a great way to divide a space without closing it in. Use these step-by-step instructions to build one in your home.

How to Build a Half Wall | how-tos | DIY

This island is built to house two 36-inch base cabinets, but can easily be modified by simply adjusting the width of the center wall. Using the Board Planning Sheet, cut the 2x4 boards to create the structural framing for the center and side walls. To ensure the lengths of "like parts" are equal, use the first cut of each group to mark each subsequent cut.
