finishing up a small job on my house and adding accent lighting to multiple rooms and want to control the lighting from multiple points. I've got the wiring down and understand using dimmers as the 3-ways is ok but question how the 4way's and 3way's will work in unison.

**Using Dimmer Switch In A 4+ Way Circuit - Electrical - Contractor Talk**

BEST ANSWER: Your option would be to to add a second switch to the wall, one, a fan speed control switch, and the other an on off light control. To do this one would need to pull an additional hot wire from the ceiling to the wall switches. You would not be able to use the remote any longer as the receiver in the fan canopy would have to be removed.
