

### **Plug In Light Switch Wiring**

With the power coming to the switch and then going to the lights, you will notice that there are two black wires, two white wires and two ground wires (bare wires). First of all we should connect the ground wires to the box. (assuming it is a steel box). If the light switch has a ground screw on it (usually green and at the bottom of the switch), connect it now.

Dimmer switches are a common source of flickering with LED bulbs. Older dimmer switches and current conventional dimmers are designed for use with incandescent light bulbs, and they often don't work well with LED bulbs. If your LED is controlled by a dimmer, the easiest fix is to buy a good-quality "dimmable" LED bulb.
