The European Union is generally ahead of the North America in restricting toxic substances in electronic products. Their latest restrictions, known as RoHS (Restriction of Hazardous Substances), went into effect in July 2006. The backdrop to the introduction of RoHS was one of increasing environmental regulations worldwide and increasing concern for human health and safety and ecosystems around ...

I have experienced an inconvenient fuel pump relay failure in FIVE of my Volvos over the years (240s and 740s). After one particularly stupid \$200 tow bill, I made it a point to replace the original Fuel Pump Relays in my older Volvos with NEW ones, and then I would carry a good used one as a spare in my glovebox, just in case.

The battery should be a combo starting/deep cycle battery, usually sold as a "marine battery". An ordinary auto battery would do for starting and lights, but for running a radio and other electronics something with a little more of a deep cycle capacity will be needed so the battery doesn't go flat while you're fishing and listening to the radio, and leave you stranded when you try to ...

Getting electrical signals from point A to point B is pretty standard thing...Put a piece of copper wire between A and B and the job is done. A century of development has left us with increased specialization in wiring, connection devices, and everything in between point A and B. "Mil-Spec" or military specification, has become the buzz-word in motorsport electrical harness construction.
